Dear members:

Since 1976 in the spirit of international goodwill I have been forwarding you one of my discoveries that are relevant to your system. The major reason is that as a poor Canadian and Chinese, I do not own and have no access to American publishers such as the Academic Press which are the usual publishers of English works of this type. The other reason is that for your system to be fair and at least minimally trustworthy at the international level, inventors such as myself have that responsibility to make our works available to you.

At this present time, I am at the end of my part of the obligation. I have made it possible, not impossible, for you to perform your duty. I can no longer be blamed for having nothing to do with the Nobel Prize system.

25 October 2006:

Enclosed please find ~~the~~ two copies of the first two discs of my

Memory, Mind and Emotions: October 2006 update

Part 1. The hidden but ever present neuroelectric current

Part 2. The marvels of use- and function-related neural growth

Part 3. Infinite combinations for emotions

Part 4. Man and androids

This update provides conclusive bionic and patient proof of my neuroelectric, memory, and mind

theory given to your earlier.

The last discs are mainly on emotions which should be finished in weeks if not earlier.

These disc are in the pal format and can be played on both 1) DVD players and 2) computers with either PowerDVD or RealPlayer program.

Sincerely,

Kuan-Chyun Cheng.
